Panda Plant

The Panda Plant is irresistible with its soft, fleshy, spoon shaped leaves that are covered with what feels and looks like white velvet. Like all succulents, it is very easy to care for. Give it lots of bright light and very little water - let the soil dry out completely between waterings. Since the Panda Plant comes in an infinite number of spectacular forms and shapes, it is a must for succulent collectors and other plants that kids will love.

Care Requirements:

Light: Bright sunlight.

Water: Water only when soil is completely dry.

Temperature: Medium 55-75 degrees.

Humidity: Low. Spray this plant once a week.
